LETTER OF RECOMMENDATION

It gives me a lot of pleasure to recommend **Sahil Sartaj** for the notified Masters programme. I have had the opportunity to observe him for four years, initially as an instructor and later more closely as a mentor of his undergraduate project.

Sahil Sartaj is a very sincere and diligent student with high motivation to excel in chosen field of studies. He has been found to be consistent in his academics, managing to retain his position amongst the top 3 in the class of 65 students throughout the 8 semesters. He actively participated during discussion, asked questions to ensure firm understanding of concepts, and sought additional sources for supplementary problem-solving exercises. He often explained concepts to fellow classmates as well. He has also shown an innovative nature and ability to think from a non-conventional point of view. I have seen a keen urge in him to understand engineering concepts beyond the theoretical purview reflecting his potential for research. As a science student, he was always meticulous when performing experiments, he led his lab group to successfully complete experiments, and he wrote great detailed analytical lab reports. Sahil Sartaj is self-motivated, dedicated, hardworking, intelligent and able to grasp difficult concepts, think critically and handle the rigor of a competitive college environment. He exhibited the qualities of a leader and promising researcher who truly loves science.

Sahil Sartaj impressed me as a student who actively seeks new experiences which support his love for science and technology. On the month of February 2021 Sartaj presented a paper titled "An intelligent system for spam message detection" in the International Conference on Innovation & Sustainability under my guidance. He diligently undertook a project on Human characteristics through an interaction between the genotype-phenotype map by the Bioinformatics approach during the 5th semester. Despite being studious, he was also active in the college extracurriculars and was elected as a coordinator of the university Computer Science Day (CS Day) in his 3rd year. He is highly ambitious showing a lot of enthusiasm for cultural and extracurricular activities. He has completed his Bachelor of Technology degree with a CGPA of 8.51 out of 10. Furthermore, before completing his B.Tech he got selected as a Software Developer in Capgemini, a multi-national company.

In the past 10 years, I have rarely come across a student with such depth of understanding of the foundations of Computer engineering. I was delighted when he approached me to write a recommendation for his admission to your esteemed institute. I am certain that the international exposure and modern technologies offered by your institute will benefit his professional career greatly. With his sincere work ethic and never-give-up attitude towards life, I am confident that he will be a valuable addition to your institute. I fully expect him to excel academically and also conduct valuable research.

I would be glad to provide further information regarding his candidature if required.

Sincerely,

Ayatullah Faruk Mollah, PhD(Engg)
